IS PROHIBITED BY LAW.**

## WEEKLY HEALTH REPORT

### CURRENT MORBIDITY IN THE CONTINENTAL UNITED STATES

The purpose of this report is to call attention to the most recent data of current significance in regard to health conditions and hospital facilities in Army posts in the continental United States. It is also planned to issue in the near future a regular monthly report in which morbidity trends will be discussed at greater length.

#### MORBIDITY DATA

In this report admission rates are shown only for all causes (disease, injury and battle casualty, if any) combined, for all diseases combined and for a few specific diseases. These rates are presented on an annual basis to facilitate comparisons with figures in annual and monthly reports. Such annual rates of admission indicate the number of admissions per 1000 mean strength which would occur over a year's time if the current week's experience continued through the year.

The report also shows the number of cases of the more common epidemic and certain other diseases of special interest. Appended to the report is a list of cases of the rarer epidemic and certain other diseases.

#### HOSPITALIZATION DATA

The number of patients remaining in hospital at the end of the week per 1000 strength, as given in this report, furnishes an approximation to the current non-effective rate. Current hospitalization conditions are presented in terms of the normal beds available and vacant and the total (normal and other) beds occupied.

#### CURRENT TRENDS

As indicated in the chart on page 3, the admission rate from all causes combined continued to rise slightly, roughly paralleling the trend during the corresponding period of 1942. The admission rate from colds, influenza, etc. remained at the same level as for the preceding week.

#### EXPLANATORY MATTER

In reading the detail tables, it should be noted that any admission rate followed by a question mark (?) denotes a rate which has been computed on the basis of 5 or fewer cases. Such rates are unreliable as indications of trend or otherwise. The symbol # has been placed after the name of stations (or groups of stations) where part or all of the data for the current week have not been received and the latest available figures have been substituted therefor.
